

Conservation Library - 2

Suggested books that are environmentally concerned and great stories as well, and you can listen to them through Audible, or possibly other books on tape sources:

Barbara Kingsolver's: "Prodigal Summer";
"Animal, Vegetable, Miracle"; "Flight Behavior";
"Unsheltered".

A gentle, engaging writer, Barbara Kingsolver is a practicing conservationist who has, at least in "Animal, Vegetable Miracle", worked at living the life of sustainability. She also points out in other books, like "Prodigal Summer" and "Flight Behavior" the ways in which rural people struggle and the luxury of knowing about species at risk. Often, she suggests, those preaching restraint need to take the lessons themselves and understand rural people better. I love her books.

Planet Earth

Of course you can see this when aired on PBS. If you are a member you can use "Passport" to see it. but here you can watch it at your leisure. I find it very beautiful, relaxing and inspiring.

Threatened and Endanger Pennsylvania Native Plants:

<https://plants.usda.gov/threat.html>. I have placed the URL in at both the beginning and end of the list.

Yeow! It hurts to read all these plant names. Imagine so many in Pa. (629 names returned) alone. Ugh! If you think that are strange plants you've never heard of... Think again!!
