

**THE WEEDERS
GARDEN HISTORY AND DESIGN COMMITTEE
2017-18 SUMMARY**

July 9, 2018

The Garden History and Design Committee wrapped up the year with a completed documentation of Inta Krombolz's property in West Chester, Fox Hollow, for the Smithsonian Archives of American Gardens. This extraordinary property was a great treat to visit, experience and study. The artistry with which a vast selection of horticultural specimens and garden features had been combined, was not just inspirational, but educational! Unfortunately, just as we completed our notes and photographs, the property was sold and the new owners began to remove trees and change everything. The Weeders got there in the nick of time!

Many thanks to my full committee, especially those directly involved in the documentation, who's perseverance and patience got us through to the end: Alice Doering, Polly Garnett, Laura Mitchell, Maria Thompson, Lesley Undercofler, Lorraine Wallace and my co-chair, Wendy Quereau. This was truly a great undertaking and will be an asset to the Smithsonian Archives.

A complete copy of our submission has been kept for our own Weeder archives, and an addition copy will remain with the Garden History and Design Committee to serve as an example for future projects. A third copy has been sent to Inta Krombolz for her personal records.

Respectfully submitted,
Julie DeVuono
Chair, Garden History and Design
