

**The Weeders Annual Meeting  
June 11, 2013**

**Horticulture Committee Report**

The Weeders accomplished quite a few things of horticultural importance this year in association with others. Many Weeders helped at the extremely well-organized bulb planting at Concourse Lake. This also gave us the opportunity to see the results of Alice Doering's hard work and vision. Weeders' gardens were also an essential element in the GCA Centennial Celebration.

**As to our own, in-club efforts--**

I would like to thank Sally Wood for her wreath-making workshop. Many enjoyed her expertise and artistry with natural materials.

Thanks also to Alice Doering for her hardwood cutting workshop. Under her expert tutelage, her selection of plant material rooted beautifully...even in January.

Lorraine's fireside chat potluck dinner may have started with horticultural tips in mind, but was simply a thoroughly enjoyable Weeder's social event.

And...for those of you who participated in my fairy-making workshop, a hearty thanks for diving in to this little world! I hope you enjoyed it!

My thanks also to the generously offered help by Lorraine and Alice helping with seed and plant selection for challenge classes and such. They helped keep me on track this year!

The workshop scheduled for this June 26<sup>th</sup> is fully subscribed. We will be making a living "painting" using small plants as our medium. This can be entered in a special class in the fall show.

Have a great summer in your gardens,

Diane McCallister
