

The Weeders

Report of the Bulletin Representative

We submitted one article for possible inclusion in the GCA Bulletin. The article covered the efforts toward Ronald McDonald House, headed by Laura Mitchell. We stressed how unique St. Christopher's Hospital was, as it served a national clientele for pediatric surgery, as well as caring for the health of an underserved community right at its door. The other Ronald McDonald House, first in the nation, serves Children's Hospital, a more recognized facility, and help for the house is received from many sources. We are the only source we know of for floral arrangements for the Ronald McDonald House serving St. Christopher's Hospital, so it is most gratifying to supply them with arrangements about three times each year.

We have not seen our article published yet, but the Bulletin only publishes articles about a few of the clubs each time, so we will be patient.

If you have any ideas for articles about Weeder activities, all thoughts are most welcome.
